Re: Contract N62470-95-D-6007
Navy CLEAN, District III
Contract Task Order (CTO) 0143
Draft Phase II Confirmatory Sampling Report
MCB, Camp Lejeune, North Carolina

Dear Mr. Stevens:

Baker Environmental, Inc. (Baker) is pleased to submit a single copy of the Draft Phase II Confirmatory Sampling Investigation (CSI) Report. Additional copies have also been forwarded to Mr. Thomas Burton at the Environmental Quality Branch at MCB, Camp Lejeune, and Mr. Scott Bailey at CH2M Hill.

Before submitting two copies of this report to Mr. David Lown and Ms. Beth Hartzell of the North Carolina Department of Environment and Natural Resources (NC DENR), I request that you and Mr. Burton review the discussions of SWMUs 255, 256, 257, 258, 265, 269, 272, 279, 285, 293, 294, 306, 308, 311, 312, 313, 314, 315, 316, and 318. Some of these oil/water separators have been described as units that discharge to a surface ditch, or some other means of eventual conveyance to a surface water body and this may not be covered in the Base's NPDES permit. I thought that you and Mr. Burton would want to confirm that the described discharge point for these units are correct and covered under the Base's NPDES permit. If these discharge points are not permitted under the Base's NPDES permit, then they could lead to a possible notice of violation (NOV) from the state. I would like to tentatively schedule a conference call for December 2, 2002 to discuss this issue. Upon conclusion of this conference call, I will issue the two copies to NC DENR as presented in the scope of work for this project. We are asking everyone to provide comments on the draft report by January 20, 2003.

We appreciate the opportunity to serve LANTDIV on this project. Should you have any questions regarding this submittal, please contact me at 412-269-2098 (email: jculp@mbakercorp.com) or in my absence, Mr. Rich Bonelli at 412-269-2033.

Sincerely,

BAKER ENVIRONMENTAL, INC.

James S. Culp, P.G.
